Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicants' preliminary amendment filed September 18, 2001 is acknowledged and has been entered. Claims 20-88 have been canceled. Claims 1-19 are now pending in the present application.
2. The information disclosure statement filed January 14, 2002 fails to comply with 37 CFR 1.98(a)(1), which requires a list of all patents, publications, or other information submitted for consideration by the Office. It has been placed in the application file, but the information referred to therein has not been considered. The some prior applications are not available to the examiner; the references are not in the parent application.
3. Applicants should update page 1 of the specification.
4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-19 are rejected under the judicially created doctrine of double patenting over claims 1-17 and 21-37 of U. S. Patent No. 6,290,962 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: the issued patent claims and discloses a method of treating gastroduodenal disease (see col. 2) in a mammal comprising administering composition comprising a *Helicobacter urease* peptide (see abstract; figures; claims; col. 8;). The patent discloses how the composition is administered as well as, mucosal adjuvants and dosage (cols. 9-10).

Claims 1-3, 8-17 and 19 are rejected under the judicially created doctrine of double patenting over claims 1 and 4-10 of U. S. Patent No. 5,837,240 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are

claiming common subject matter, as follows: the issued patent claims and discloses a method of treating gastroduodenal disease (see col. 1) in a mammal comprising administering composition comprising a *Helicobacter* urease peptide (see abstract; claims). The patent discloses how the composition is administered as well as, mucosal adjuvants and dosage (col. 12).

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(f) he did not himself invent the subject matter sought to be patented.

6. Claims 1-3, 8-17 and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Czinn et al (5538729).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Czinn et al discloses a method of treating gastroduodenal diseases (gastritis, ulcers, gastric cancer, duodenal ulcer diseases) comprising administering a *Helicobacter* antigen (abstract; col. 1; claims). Czinn et al discloses oral administration as well as a mucosal adjuvant, cholera toxin/B subunit (col. 2; col. 4). The patent discloses a suitable dosage of 10 micrograms to 10 milligrams (col. 4). It is noted that the claims recite that the composition is a composition comprising *Helicobacter* urease peptide; this composition could comprising other components as well.

7. Claims 1-19 are rejected under 35 U.S.C. 102(f) because the applicant did not invent the claimed subject matter. The claimed invention is claimed in the above cited US Patents (5538729). There is no common inventorship.

8. No claims are allowed.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
